

# Planet data

Henry and Matt looked on the Internet to find some data about the planets. They found out the sizes of the planets and the number of moons that each planet has.

Henry and Matt plotted the data as a bar graph.

Planet data

## Questions

1. Which planet has the same number of moons as the Earth?
2. How many moons does this planet have?
3. Which two planets have no moons?
4. Which is the largest planet?
5. Which is the smallest planet?
6. Does the size of the planet seem to affect how many moons it has?
7. Give reasons for your answer to Question 6.
8. What is the total number of moons in the Solar System?
9. Write a list of the planets in order of size, from the smallest to the largest.
10. Describe any patterns that you can see in the planet data.
