

Name: _____

Organising data

1. Data charts are a good way of organising factual information. Use both the written and picture information in the text to complete the data chart. Your information should be written in point form.

Vertebrate	✓					
Invertebrate						
Carnivore	✓					
Herbivore						
Omnivore						
Land	✓					
Aquatic						
Aerial						
Lurker						
Pack hunter						
Herd						
Migrates						

Animal migration

2. Return migration is when groups of animals live in one place in the summer and another in the winter. Choose an animal that uses return migration. Using information from the text and other available resources, find out about the path your animal takes during its journey. Mark the path on the map of the world provided.

Name: _____

Writing a research report

Choose an animal from the text. List information about the animal of your choice in point form beneath the following categories.

My chosen animal is: _____

Description

Habitat

Shelter

Enemies

Composing

A report starts with a general statement that identifies and classifies the subject of the report. Have a go at writing your own general statement here.

Publishing

Once you have edited your draft, publish your completed report on a desktop program. Think about the size of headings and sub-headings, placement of pictures/captions, font choice and layout of information.
