

Catch Up Your Code

Catch-up phonics programme for ages 7-14

Teacher's Resource

Fast, effective 10-minute lessons covering:

SHORT VOWEL SOUNDS

CONSONANT SOUNDS: 1

LONG VOWEL SOUNDS: 1

CONSONANT SOUNDS: 2

LONG VOWEL SOUNDS: 2

The structure of *Catch Up Your Code*

The lessons in *Catch Up Your Code* allow students to explore each sound, think about where that sound occurs in the word and then look at the different ways the sound can be written. They expose students to the critical concept that words are made up of sounds (knowledge of the alphabetic principle) and that sounds can be written in many different ways (knowledge of the alphabetic code).

Students use their own vocabulary knowledge to provide words containing the target sound. These words can be used to generate discussion. It is not expected that students will find every possible spelling pattern for the target sound, but they will discover that there is diversity in the way most sounds can be written. A strong foundation knowledge of the diversity of the alphabetic code will lay the foundation for teaching morphology and common, helpful spelling rules and conventions. This in-depth knowledge about the structure of written English will help students to decode and understand the meanings of words as they read, and to spell words the way they are supposed to look as they write.

Lesson structure

Every lesson follows the same format, but the content changes with each new lesson. Lessons contain examples of words showing the most common spelling patterns for each sound, although students may not think of words with every pattern. Each lesson takes only 10 minutes.

There are short practice activities for each lesson to help embed the new learning, which ask students to identify phoneme-grapheme relationships and syllables in words.

In the **i** section there is information about relevant rules and conventions, which supports teachers to answer questions that may arise. It is not expected that students will be taught this information during the lesson. Additional support is included for sounds that may be difficult for English learners.

At the end of each lesson, students are asked what they found out about the sound and the way it is written. The teacher writes 'We found' on the board and records their findings. Students create their own sound chart for the sound being taught and add this information. New information can be added at any time.

We found ...

instruction The /e/ sound

You will need: Practice activities for the /e/ sound

Using the example below as a guide, draw a sound chart leaving the WORDS and SPELLING PATTERNS columns empty.

POSITION	WORDS	SPELLING PATTERNS
Start with /e/	egg, elephant, evidence, anything	
/e/ inside	pen, method, weather, head, said, friend, many	
End with /e/		

Support for English Learners
The /e/ sound is not present in Arabic and Polish. Speakers of these languages may need extra time and practice to pronounce and recognize that sound.

practice
Have students complete the practice activity for the /e/ sound. They should first underline any words that contain the /e/ sound, then circle and record the spelling patterns for the /e/ sound.

Support for English Learners
The /e/ sound is not present in Arabic and Polish. Speakers of these languages may need extra time and practice to pronounce and recognize that sound.

Support for English Learners
The /e/ sound is not present in Arabic and Polish. Speakers of these languages may need extra time and practice to pronounce and recognize that sound.

Support for English Learners
The /e/ sound is not present in Arabic and Polish. Speakers of these languages may need extra time and practice to pronounce and recognize that sound.

i The ea pattern for the /e/ sound usually occurs before these sound-spelling patterns:
d — head;
th — breath;
lth — wealth;
sure — measure.

Support for English Learners
 The /e/ sound is not present in Arabic and Polish. Speakers of these languages may need extra time and practice to pronounce and recognise this sound.

instruction

The /sh/ sound

WHOLE CLASS ACTIVITY

i The /sh/ sound can be written in many different ways. The **sh** pattern is the most common way of writing it on the end and at the start of words, although a few words of French origin that start with /sh/ have **ch**.

The /sh/ sound can be heard in suffixes that sound like 'shun', 'shul' and 'shus' and there are different ways of writing it: station, tension, mission, fashion, special, anxious, conscious.

If the /sh/ sound is heard on the end of a root word inside a word, it will usually be written **sh** (crashing, finished).

Support for English Learners

The /sh/ sound is not present in Spanish, Polish and Cantonese. Speakers of these languages may need extra time and practice to pronounce and recognise this sound.

You will need: Practice activities for the /sh/ sound

Using the example below as a guide, draw a sound chart leaving the WORDS and SPELLING PATTERNS columns empty.

POSITION	WORDS	SPELLING PATTERNS
Start with /sh/	shadow, shark, chef, charade, sure	sh ch s  
/sh/ inside	cushion, brochure, issue, caution, suspension, anxious, precious, conscious, ocean, permission, mashed	shi ch ss ti si xi ci sci ce ssi sh 
End with /sh/	wish, quiche, liquorice	sh che ce  

Say: Think of some words that contain the /sh/ sound. Which box do they go in — start with, inside or end with?

The chart example above contains samples of words and patterns students might find for this sound. As students suggest words, check that the word does have a /sh/ sound, not a /zh/ or /ch/ sound. Remind students they are listening for the /sh/ sound in words, not looking for the letters **sh**.

What did we find out about the /sh/ sound? Where does it occur? How do we write it?

We found the /sh/ sound occurs at the start, inside and on the end of words. Although **sh** is a very common way of writing it, there are many other ways, especially when the /sh/ sound is part of a suffix inside a word.

Have students create a personal sound chart for the /sh/ sound using words from the shared chart or words they have thought of themselves.

practice

Have students complete the practice activity by first circling and recording the spelling patterns for the /sh/ sound.

The second part of the activity is identifying syllables and vowel spelling patterns in words.

▼ PRACTICE ACTIVITIES

Name: _____

/ng/

Circle the spelling patterns for the /ng/ sound you hear at the end of *ring*, and list the spelling patterns you have found.

sing	pink	strongest	singing
	evening	junk	fling
clang	strung	single	jungle

Spelling patterns identified:

How many syllables are in these words?

exploring banking challenging outstanding

Each syllable contains a vowel sound. Circle the vowel spelling patterns in each syllable.

/sh/

Circle the spelling patterns for the /sh/ sound, as in *shoe*, and list the spelling patterns you have found.

shadow	chute	sure	cushion
	issue	caution	suspension
anxious	precious	conscious	sugar
	ocean	permission	quiche

Spelling patterns identified:

How many syllables are in these words?

animation tissues cautious accomplish

Each syllable contains a vowel sound. Circle the vowel spelling patterns in each syllable.
