

Name: _____

1. Draw a line to match each piece of information with the correct text type.

The mountain streams contain aquatic ecosystems that are easily destroyed when the brumbies trample through them.

Information Report

Governments use different methods to stop dangerous new pests entering a country.

Feral cats are also pests because they spread diseases to farm animals and pets.

Ecosystems in Victoria's high country cannot exist anywhere else, but the brumbies can.

Exposition

Some methods of controlling feral animals can harm native wildlife.
