

Oil

Name: _____

Write your own definition for each of the underlined words.

Barriers were quickly placed around the oil to stop it from spreading but unfortunately, there was a huge storm in the area two days after the spill.

On the other hand, those who think the world's reliance on oil should be decreased say Earth's supplies of oil will run out.

The heated sea water removed some of the oil, but it also killed many of the tiny plants that grew on the shore and destroyed the habitats of countless sea birds and marine animals.
